## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 25 June 2008 has been entered.

### *Claim Objections*

2. Claims 20- 23 are objected to because of the following informalities:

Claim 20 fails to positively recite the wet and dry chambers as a definitive element in the inventive structure. Without a positive recitation of the wet and dry chambers, claim 20 recites nothing more than a flexible portion and a rigid portion, with no clear structural connection to any chamber or probe.

Claim 22 is objected to because it is unclear whether the term "formed of" renders the claim inclusive or exclusive of the limitations that follow it.

Claim 23 fails to further limit the method recited in claim 22, as claim 23 recites only structural limitations, and thereby lacks any additional limitations for the steps of the inventive method.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-3 and 5-21 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: an ultrasound transducer, or any similar element that would relate the recited elements to the ultrasound probe set forth in the preamble.

Art Unit: 3737
